### REASONS FOR ALLOWANCE

The following is an Examiner's Statement of Reasons for Allowance:

The prior arts of record teaches a method for restoring service in a mesh network formed of a plurality of nodes, at least two of which serves as end points for originating and/or terminating traffic. At least one of a pair of connected nodes monitor the channels in connected links to detect a link in failure and upon detecting a link in failure, one node determines whether the link in failure includes at least one available channel to carry the traffic unable to pass on the failed channel. Chaudhuri, U.S. Patent No. 6,324,162 is one such example of prior art. The prior arts of record, however, fails to teach, singly or in combination, a monitor module coupled to a first link and a controller coupled to the monitor module that receives a failure signal, a service module coupled to the controller receives a first control signal and transmits on a second link a message signal, the message signal includes information regarding the failure of the first link. The subject matter sought to be patented as recited in the claims in this application has practical applications in the field of communications networks.

Any comments considered necessary by applicant must be submitted no later than the payment of the Issue Fee and, to avoid processing delays, should preferably **accompany** the Issue Fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Nadeem Iqbal whose telephone number is (703)-308-5228. The examiner can normally be reached on M-F (8:00-5:30) First Friday Off.
